INDEX TO VOL. XC. (A)

Acids, nature of, and constitution of polybasic (Armstrong and Worley), 73.
α-Rays, effect of magneton in scattering (Hicks), 356.
Aluminium in gold, dilute solutions of (Heycock and Neville), 560.
Andrade (E. N. da C.) The Flow in Metals under Large Constant Stresses, 329.
Armstrong (H. E.), Colgate (R. T.), and Rodd (E. H.) Morphological Studies of Benzene Derivatives. V.—The Correlation of Crystalline Form with Molecular Structure : a Verification of the Barlow-Pope Conception of "Valency-Volume," 111 ; —— and Rodd (E. H.) Morphological Studies of Benzene Derivatives. VII.—The Correlation of the Forms of Crystals with their Molecular Structure and Orientation in a Magnetic Field in the case of Hydrated Sulphonates of Dyad Metals, 463 ; —— and Walker (E. E.) Studies of the Processes Operative in Solutions. XXIX.—The Disturbance of the Equilibrium in Solutions by "Strong" and "Weak" Interfering Agents, 375 ; —— and Worley (F. P.) Studies of the Processes Operative in Solutions. XXXI.—Sulphonic Acids and Sulphuric Acid as Hydrolytic Agents—a Discussion of the Constitution of Sulphuric and other Polybasic Acids and of the Nature of Acids, 73 ; XXXII.—The Influence of Sulphonates on the Hydrolytic Activity of Sulphonic Acids : a Contribution to the Discussion on the Influence of Neutral Salts, 101.
Atmospheric potential gradient, sources of disturbance of (Rudge), 571.

Bakerian Lecture (Fowler), 426.
Benzene derivatives, morphological studies of (Armstrong, Colgate, and Rodd), 111 ; (Mummery), 455 ; (Armstrong and Rodd), 463.
Bores, theory of long waves and (Rayleigh), 324.
Bousfield (W. R.) Note on Osmotic Pressure, 41 ; —— The Osmotic Data in Relation to Progressive Hydration, 544.
Brown (S. G.) Chemical Action that is stimulated by Alternating Currents, 26.
Brückner's weather cycle, application of Newcomb's method to (Schuster), 349.
Buchan (A.) Obituary Notice of, i.

Campbell (A.) and Dye (D. W.) On the Measurement of Alternating Currents of High Frequency, 621.
Campbell (C.) See Dixon, Campbell, and Slater.
Chemical action stimulated by alternating currents (Brown), 26.
Chree (C.) The 27-day Period in Magnetic Phenomena, 583.
Clarke (A. R.) Obituary Notice of, xvi.
Colgate (R. T.) See Armstrong, Colgate, and Rodd.
Collie (J. N.) Note on the Paper by T. R. Merton on Attempts to produce the Rare Gases by Electric Discharge, 554.
Colour-vision, anomalous trichromatic (Watson), 443.
Crookes (Sir W.) On the Spectrum of Elementary Silicon, 512.
Crystalline form and molecular structure (Armstrong, Colgate, and Rodd), 111.
Crystal symmetry and molecular constitution of organic compounds (Wahl), 1.
Crystals, correlation of forms of, with molecular structure and orientation in magnetic field (Armstrong and Rodd), 463.

Curtis (W. E.) Wave-lengths of Hydrogen Lines and Determination of the Series Constant, 605.

Diffraction of light by spheres of small index (Rayleigh), 219.
Dimethylenediol peroxide (Fenton), 492.
Dixon (H. B.), Campbell (C.), and Slater (W. E.) Photographic Analysis of Explosions in the Magnetic Field, 506.
Donnan (F. G.), and Green (G. M.) The Variation of Electrical Potential across a Semi-permeable Membrane, 450.
Dust, electrification of cloud of (Rudge), 256.
Dye (D. W.) See Campbell and Dye.

Electric waves, transmission around the earth's surface (Macdonald), 50.
Electrical condition of gold surface during absorption of gases (Hartley), 61 ; —— ignition of gaseous mixtures (Thornton), 272 ; —— potential, variation across a semi-permeable membrane (Donnan and Green), 450.
Electricity, emission of, from various substances at high temperatures (Kaye and Higgins), 430.
Electrification of water by splashing and spraying (Nolan), 531 ; —— produced during raising of dust cloud (Rudge), 256.
Electromotive force of Weston normal cell, determination of (Shaw), 240.
Electron emission from glowing solids (Horton), 548.
Electrons, diffusion through a slit (Mackie), 69.
Eumorfopoulos (N.) The Boiling Point of Sulphur on the Thermodynamic Scale, 189.
Eutectics, growth of metallic (Lamplough and Scott), 600.
Explosions in magnetic field, photographic analysis of (Dixon, Campbell, and Slater), 506.
Eye, axial chromatic aberration of human (Nutting), 440.

Fatigue limits under alternating stress (Stromeyer), 411.
Fenton (H. J. H.) Dimethylenediol Peroxide (Diformal Peroxide Hydrate), 492.
Flow in metals under large stresses (Andrade), 329.
Fluids, similarity of motion and the surface friction of (Stanton and Pannell), 394.
Fourier's theorem, calculations in illustration of (Rayleigh), 318.
Fournier d'Albe (E. E.) On a Type-reading Optophone, 373.
Fowler (A.) Series Lines in Spark Spectra, Bakerian Lecture, 426.
Functional equation employed by Stokes (Stirling), 237.

γ-Rays, excitation of, by β-rays (Richardson), 521.
Gases, absorption and catalytic combustion, electrical condition of gold surface during (Hartley), 61 ; —— absorption of, in discharge tube (Newman), 499 ; —— rare, attempts to produce by electric discharge (Merton), 549 ; (Collie), 554.
Green (G. M.) See Donnan and Green.
Griffiths (E. H. and E.) The Capacity for Heat of Metals at Low Temperatures, 557.

Hartley (H.) The Electrical Condition of a Gold Surface during the Absorption of Gases and their Catalytic Combustion, 61.
Hartley (Sir W. N.) Obituary Notice of, vi.
Heat, capacity for, of metals at low temperatures (Griffiths), 557 ; —— convection of, from small cylinders in stream of fluid (King), 563.
Heycock (C. T.) and Neville (F. H.) Dilute Solutions of Aluminium in Gold, 560.
Hicks (Wm.) On the Effect of the Magneton in the Scattering of α-Rays, 356.
Higgins (W. F.) See Kaye and Higgins.
Holt (A.) The Rate of Solution of Hydrogen by Palladium, 226.

Horton (F.) On the Origin of the Electron Emission from Glowing Solids, 548.
Houstoun (R. A.) The Dispersion of a Light Pulse by a Prism, 298.
Hydrogen lines, wave-lengths of, and determination of series constant (Curtis), 605 ; —— rate of solution of, by palladium (Holt), 226.

Ignition, electrical, of gaseous mixtures (Thornton), 272.
Ionisation of gases by collision and the ionising potential (Pawlow), 398 ; —— thermal, from carbon (Richardson), 174.
Iron, magnetically shielded, properties of, as affected by temperature (Wilson), 343.

Kalandyk (S. J.) On the Conductivity of Salt Vapours, 634.
Kaye (G. W. C.) and Higgins (W. F.) The Emission of Electricity from Various Substances at High Temperatures, 430.
King (L. V.) On the Convection of Heat from Small Cylinders in a Stream of Fluid, 563.

Lamplough (F. E. E.) and Scott (J. T.) The Growth of Metallic Eutectics, 600.
Larmor (Sir J. and J. S. B.) On Protection from Lightning and the Range of Protection afforded by Lightning Rods, 312.
Light pulse, dispersion by a prism (Houstoun), 298.
Lightning, protection from, and the range of lightning rods (Larmor), 312.
Luminosity, application of electrolytically produced (Walter), 437.
Luminous vapours distilled from the arc (Strutt), 364.

Macdonald (H. M.) The Transmission of Electric Waves around the Earth's Surface, 50.
Mackie (J. H.) The Diffusion of Electrons through a Slit, 69.
McLennan (J. C.) and McLeod (A. R.) On the Mercury Green Line $\lambda = 5461$ resolved by Glass and Quartz Lummer Plates and on its Zeeman Constituents, 243.
McLeod (A. R.) See McLennan and McLeod.
Magnetic phenomena, 27-day period in (Chree), 583 ; —— properties of iron shielded from earth's magnetism (Wilson), 179 ; —— susceptibility, influence of molecular constitution and temperature (Oxley), 395.
Magneton, effect of, in scattering α-rays (Hicks), 356.
Marshall (H.) Obituary notice of, xiv.
Mercury green line $\lambda = 5461$ resolved, and its Zeeman constituents (McLennan and McLeod), 243.
Merton (T. R.) Attempts to produce the Rare Gases by Electric Discharge, 549.
Metals, capacity for heat at low temperatures (Griffiths), 557 ; —— under large stresses, flow in (Andrade), 329.
Meteoric iron from Orange Free State (Rudge), 19.
Molecular constitution and crystal symmetry of organic compounds (Wahl), 1.
Mummery (C. S.) Morphological Studies of Benzene Derivatives. VI.—Parasulphonic Derivatives of Chloro-, Bromo-, Iodo-, and Cyano-benzene, 455.

Neville (F. H.) See Heycock and Neville.
Newcomb's method of investigating periodicities (Schuster), 349.
Newman (F. H.) Absorption of Gases in the Discharge Tube, 499.
Nolan (J. J.) Electrification of Water by Splashing and Spraying, 531.
Nutting (P. G.) The Axial Chromatic Aberration of the Human Eye, 440.

Obituary Notices :—
Buchan, A., i.
Hartley, Sir W. N., vi.
Marshall, H., xiv.
Clarke, A. R., xvi.

Oldham (R. D.) On the Effect of the Gangetic Alluvium on the Plumb-line in Northern India, 32.
Optophone, on a type-reading (Fournier d'Albe), 373.
Osmotic data in relation to progressive hydration (Bousfield), 544 ; —— pressure, note on (Bousfield), 41.
Oxley (A. E.) The Influence of Molecular Constitution and Temperature on Magnetic Susceptibility, 395.
Ozone in upper atmosphere (Pring), 204.

Palladium, solution of hydrogen by (Holt), 226.
Pannell (J. R.) See Stanton and Pannell.
Pawlow (W. I.) On the Ionisation of Gases by Collision and the Ionising Potential for Positive Ions and Negative Corpuscles, 398.
Periodicities, Newcomb's method of investigating, and its application to Brückner's weather cycle (Schuster), 349.
Plumb-line in northern India, effect of Gangetic alluvium on (Oldham), 32.
Pring (J. N.) The Occurrence of Ozone in the Upper Atmosphere, 204.

Radiation, the formula for black body (Walker), 46.
Rayleigh (Lord). On the Diffraction of Light by Spheres of Small Relative Index, 219 ; —— Some Calculations in Illustration of Fourier's Theorem, 318 ; —— On the Theory of Long Waves and Bores, 324.
Richardson (H.) The Excitation of γ-Rays by β-Rays, 521.
Richardson (O. W.) The Origin of Thermal Ionisation from Carbon, 174.
Rodd (E. H.) See Armstrong and Rodd ; Armstrong, Colgate, and Rodd.
Rudge (W. A. D.) On a Meteoric Iron from Winburg, Orange Free State, 19 ; —— On the Electrification produced during the Raising of a Cloud of Dust, 256 ; —— On some Sources of Disturbance of the Normal Atmospheric Potential Gradient, 571.

Salt vapours, conductivity of (Kalandyk), 634.
Schuster (A.) On Newcomb's Method of Investigating Periodicities and its Application to Brückner's Weather Cycle, 349.
Scott (J. T.) See Lamplough and Scott.
Shaw (A. N.) A Determination of the Electromotive Force of the Weston Normal Cell in Semi-absolute Volts, 240.
Silicon, spectrum of elementary (Crookes), 512.
Slater (W. E.) See Dixon, Campbell, and Slater.
Solutions, processes operative in (Armstrong and Worley), 73, 101 ; —— disturbance of equilibrium by interfering agents (Armstrong and Walker), 375.
Spectra, spark, series lines in (Fowler), 426.
Spectrum series and their origin (Strutt), 364.
Stanton (T. E.) and Pannell (J. R.) Similarity of Motion in Relation to the Surface Friction of Fluids, 394.
Stirling (Sir J.) Note on a Functional Equation employed by Sir George Stokes, 237.
Stokes (Sir George), note on a functional equation employed by (Stirling), 237.
Stromeyer (C. E.) The Determination of Fatigue Limits under Alternating Stress Conditions, 411.
Strutt (Hon. R. J.) Luminous Vapours distilled from the Arc, with Applications to the Study of Spectrum Series and their Origin.—I, 364.
Sulphonic and sulphuric acids as hydrolytic agents (Armstrong and Worley), 73, 101.
Sulphur, boiling point of, on thermodynamic scale (Eumorfopoulos), 189.

Telectroscopy, a step towards (Walter), 437.
Thompson (S. P.) Note on Mr. Mallock's Observations on Intermittent Vision, 448.
Thornton (W. M.) The Electrical Ignition of Gaseous Mixtures, 272.

"Valency-volume," verification of Barlow-Pope conception of (Armstrong, Colgate, and Rodd), 111.
Vision, note on Mr. Mallock's observations on intermittent (Thompson), 448.

Wahl (W.) The Relation between the Crystal Symmetry of the Simpler Organic Compounds and their Molecular Constitution.—Part III, 1.
Walker (E. E.) See Armstrong and Walker.
Walker (G. W.) On the Formula for Black Body Radiation, 46.
Walter (L. H.) An Application of Electrolytically Produced Luminosity, forming a Step towards Telectroscopy, 437.
Watson (W.) On Anomalous Trichromatic Colour Vision, 443.
Waves, long, and bores, theory of (Rayleigh), 324.
Wilson (E.) The Magnetic Properties of Iron when Shielded from the Earth's Magnetism, 179; —— On the Properties of Magnetically Shielded Iron as Affected by Temperature, 343.
Worley (F. P.) See Armstrong and Worley.

END OF THE NINETIETH VOLUME (SERIES A).

HARRISON AND SONS, Printers in Ordinary to His Majesty, St. Martin's Lane.
